The General Health Questionnaire (GHQ) is a psychometric screening tool to identify common psychiatric conditions. It has been translated and validated in at least two languages in addition to English, including Spanish and Persian. The questionnaire comprises a number of questions, each with a four-point Likert scale for responses. There are versions with 12, 28, 30 and 60 questions. It is considered valid for use on adults and adolescents, but not children, and is available on purchase. General health definition: A person's health is the condition of their body and the extent to which it is free from | Meaning, pronunciation, translations and examples. A person's health is the condition of their body and the extent to which it is free from illness or is able to resist illness. COBUILD Advanced English Dictionary.
