GURU NANA K LEADS THE MODERN SCIENCE

DR COL DALVINDER SINGH GREWAL*

INTRODUCTION

Stephen Hawking is regarded as the most brilliant theoretical physicist since Einstein. He is also the most read scientist of the day. His book ‘A Brief History of Time’ was on the London Sunday Times bestseller list for over four years, longer than any book so far. During one of my travels I bought the book. First page of the book started with Bertrand Russel describing how the earth orbits around the sun and how the sun, in turn orbits around the center of a vast collection of stars called our galaxy. At the end of the lecture, a little old lady at the back of room got up and said: “What you have told us is rubbish. The world is really a flat plate supported on the back of a giant tortoise.” The scientist gave a superior smile before replying, “What is the tortoise standing on?”

I was surprised. Guru Nanak (1469-1539), the first Guru of Sikhs faced this very question 500 years ago. He replied it very diligently. Similar to the tortoise story in Europe, the prevalent Indian myth was, ‘The earth is settled on the horns of a bull’. Guru Nanak’s reply too was in question form, “If the earth is settled on the horns of a bull, where does the bull stand? Or for that matter how many earths support bulls or how many bulls support earths?” (Sri Guru Granth Sahib p.3)

As I read the first page further, I found this greatest scientist of the time caught in a web of confusion. He had more questions than answers. Had he read Guru Nanak or Sri Guru Granth Sahib (SGGS), the holy scripture of the Sikhs, he would have not been confused.

* Director Principal Bhai Maha Singh College of Engg. Muktsar <Dalvinder45@yahoo.co.in>
Answers to all his questions are available in SGGS. Guru Nanak propounded the truth when it was taboo. India was ruled by the invaders and speaking out universal truth would attract death punishments. Hawking mentions that Copernicus, in 1514 who proposed the idea that sun was stationary at the center and that the earth and the planets moved in circular orbits around the sun, feared being branded a heretic by the Church, hence circulated his model anonymously (Hawking: p. 4). Copernican model propagated that “fixed stars did not appear to change their positions apart from a rotation across the sky caused by the earth spinning on its axis, hence it became natural to suppose that the fixed stars were objects like our sun (Hawking: p.5). His idea was taken up a century later by Kepler and Galileo Galilee. However, just around the time Copernicus was toying with his idea, Guru Nanak had already said fearlessly, “Numberless are earths and the mountains for doing virtuous deeds and numberless over numberless Dhruvs (stars), the instruction receivers. Numberless are Indras, the moons, the suns; numberless are the universes and numberless countries” (SGGS: p.7). Some other questions raised by Hawking have been well explained by Guru Nanak as we find this in table 1.

Table 1: Answers to Hawking’s questions available in Guru Nanak’s hymns

past? (Hawking :p.6) b) Is the universe expanding or contracting? (Hawking: p.6) c) Is the universe eternal and unchanging? (Hawking(a): p.6) What could have caused the stars to turn on in the first place? (Hawking: p.7) What was the first cause of creation of the universe? (Hawking: p.8) Did the God create the universe? (Hawking: p.9) Is it right to imagine that the God created the universe at the instant of big bang? (Hawking: p10)

4. When was the universe created? (Hawking: p.8)

5 Whether the universe had beginning in time? (Hawking: p.8) What did God do before He created the universe? (Hawking: p 9) Did the time start with big bang? (Hawking: p9)

6 Have the Newton's theory of gravitation and Einstein's general theory of relativity and quantum mechanics provided the right answer to the beginning, existence and ending of the universe? (Hawking: p 9-12)

expansion and whereby millions of rivers (of galaxies) began to flow. (SGGS: p.3) We find these answers: 1: Universe did not exist forever. 2. It was created at a finite time in the past. 3. The universe has been expanding ever since its origin 4. The universe is continuously changing and not static. 5. The stars were formed with the expansion of energy. 6. The Lord created the universe with one sound (bang!)

4. None can tell the time of creation except the Creator. (SGGS: p.3)

5. For countless ages, there was utter darkness. There was no earth and sky. The Infinite Lord's will alone was pervasive. There was neither day, nor night, nor moon, nor sun. The Lord sat in profound meditation….. There was no hell, nor heaven, nor death, nor time.” (SGGS: p.1035) “Time originated from sun” (SGGS: p.357) Universe thus did not have the beginning in time.

6. No. They have not. Guru Nanak has explained the beginning, existence, expansion and end of universe clearly as follows: With one word the Lord created the universe and started the expansion of the universe into
millions of rivers (of galaxies) (SGGS: p.3). He created the universe smoothly (SGGS: p.930). The existence of the universe is as per Lord’s Will and will end when He so wills. (SGGS: p.1-2)

7. Why are we on earth? (Hawking: p.14)
8. Where did we come from? (Hawking: p.14)

7. We are on earth to perform according to His Will.¹
8. We came from the True Lord and our ultimate aim is to merge wherefrom we came i.e., into the true Lord.²

If Guru Nanak’s above renderings are compared with the modern scientists, we find that they too agree with the same conclusions.

In 1929, Edwin Hubble made observation that wherever you look, distant galaxies are moving rapidly away from us. In other words the universe is expanding. This means that at earlier times objects would have been closer together. Indeed, it seemed that there was a time, about ten or twenty thousand million years ago, when they were all at exactly the same place and when the universe was having a point of infinite temperature and density. This discovery finally brought the question of the beginning of the universe into the realm of science. (Hawking: p.9)

2. A set of theories of the universe known as big bang theories satisfy the cosmological principle. Basically, these cosmologies say that once upon a time there was a great big bang that created the universe from nothing very vividly on the Lord created nothingness from nothingness (SGGS p.1037).

The big bang can be understood only as a moment captain of the whole universe (SGGS p.357). He went on creating the entire world from nothingness (SGGS pp.1037-1039). Everything from nothing very vividly on the Lord created the entire universe from nothing very vividly on (SGGS p.3).

Allen Sandage, The big bang can be understood only as a... (SGGS p.223).

About creation of life Guru Nanak explained, "The physical body is created by the union of air and water, the life is created by the union of semen and blood and the life is created by the union of all five elements. Everything is created out of Him alone. (SGGS: p.223)

There is only One Lord who created the entire universe, (SGGS p.1188). Everything is created out of Him alone. (SGGS: p.1036)

2 All the five elements were created from nothingness. (SGGS p.1036) He further explained how the Lord created the universe from nothingness (SGGS p.1037).

d) He went on creating the entire nature creating nothingness from nothingness (SGGS p.1037).
e) The Lord started creating regions and the universes from unmanifest to manifest (SGGS p.1037).
3 Unlimited Expanse of the Universe

a) The spread of the universe is limitless. Man is not alone in the universe. No one knows how much is the spread of universe. (SGGS: p.9)¹¹ No one knows his end. (SGGS: p.469)¹² There are millions of regions and nether lands. These are beyond my calculations.¹³ Billions are the airs, waters and fires. Billions are the countries and earths. Billions are the suns, moons and planets. (SGGS: p.176).¹⁴ The Lord created the physical world in numerous varieties of colours. He goes on creating the universe the way His Greatness is. (SGGS: p.6)¹⁵

"miracle." "...the world is too complicated in all its parts and interconnections to be due to chance alone."¹⁶

Hawking: Scientists have failed to describe the universe.¹⁷

Georges Lemaître: “Existence began with the detonation of a "primordial atom" of infinite density.”¹⁸

3. Unlimited Expanse of the Universe

French biologist Jacques Monod wrote, “The ancient covenant is in pieces: man knows at last that he is alone in the universe’s unfeeling immensity; out of which he emerged only by chance.”²⁶

Hubble’s observations suggested that there was a time, called the big bang, when the universe was infinitesimally small and infinitely dense. Under such conditions all the laws of science, and therefore all ability to predict the future, would break down. If there were events earlier than this time, then they could not affect what happens at the present time. Their existence can be ignored because it would have no observational consequence. One may say that time had a beginning in the big bang, in the sense that earlier time simply would not be defined. (Hawking: p. 10-11)

9. Through the true knowledge, meditation on True Lord's name and living a truthful life, the enlightenment of the truth occurs. (SGGS: p.223) The worldly attachments and detachments are the two sides. The faith is the deciding factor between the two.39

11. If God shows mercy then one remembers Him. His soul is softened and He remains absorbed in the Lord's love. He makes his soul one with the Supreme soul. His mind's duality is reabsorbed in the mind. By Guru's Grace the lord is obtained. (SGGS: p.661)42

9. Pope, John Paul II declared that “Faith and reason are like two wings on which the human spirit rises to contemplation of the truth.”40 Einstein said, “Religion without science is blind; science without religion is lame.”41

11. Francis Collins, Director of the National Human Genome Research Institute, insists that “a lot of scientists really don’t know what they are missing by not exploring their spiritual feelings.”43

The answers given by Guru Nanak are not just off the cuff given by a layman. They are born out of his deep knowledge and vast experience; both divine and worldly. They are empirically verifiable as can be seen from the observations made by various modern scientists. Some other important Questions about Universe and Nature as answered by Guru Nanak Dev are reproduced in Tables 3-4 below:

<tbody>
<tr>
<td>1. What is Nature?</td>
<td>1. The entire universe, the environment and their functioning in a system are all nature. It is beyond a human being to describe the nature of the Lord.</td>
</tr>
<tr>
<td>2. What is the power and extent of the nature?</td>
<td>2. The power and extent of nature are beyond the measuring capability of the human beings. By Lord’s power is the entire creation. His limit cannot be known as the limit of the Nature cannot be known.</td>
</tr>
<tr>
<td>3. Who has created the nature?</td>
<td>3. The Lord only created the Nature. God created the Nature as He thought fit and right what to do next.</td>
</tr>
</tbody>
</table>
4. What all does the nature include?

5. How did He create the nature?

6. Why was the nature created?

7. How is the nature changing regularly & systematically?

4. God created nights, seasons, lunar-days, weekdays, wind, water, fire and nether lands. In the midst of these He established earth as a home for mediation. In it He placed living beings of different habits and kinds. He All this is His nature.

5. The Supreme Lord created the nature with one word.

6. He has established this wonderful show as a play for Himself.

7. Having created the entire nature, He has set a continuous change system and continues destroying and creating nature. He does everything as He wishes.

During Guru Nanak’s era scientific approach was then a neglected field in India and science was the casualty of orthodoxy. There was a need for general awakening of the people to take them off from the darkness of ignorance and to propagate the true path as envisioned by Guru Nanak.

The world then was not even aware of laws of gravitation, solar system, earth’s rotation around the sun and the existence of countless stars and galaxies in the universe. It was not known then that the air was a creation from heat and water was created from air. It was the sun-rays which helped origination of nature.

Guru Nanak had not only a great vision but also a very scientific and analytic mind. Through his knowledge and analytical and scientific vision, he propounded certain Doctrines which were very new to the world. Most of these are still under study.

Guru Nanak undertook journeys to bring in a change and moved from place to place enlightening the people about the truth of life and ultimate reality. His approach to the study of universe was analytical,
systematic and scientific and his propagation of scientific truth was realistic and humane.

Through inquisition, experience, intuition and super-consciousness, Guru Nanak has answered the most difficult questions which the modern science has not been able to answer so far and is not likely to provide the answer if it does not change the methodology of inquiry. Guru Nanak’s answers to the various questions, theories, concepts and doctrines are certainly going to be the guiding light for the future inquiries hence need the due attention of the scientific world at large.

Guru Nanak Dev University is the first University of the region which introduced on-line admissions to its courses, on-line counselling for State Level Admissions and Credit Based Evaluation System. All the results have been computerized and OMR (Optical Magnetic Recognition) system is being used to bring in more efficiency and transparency. It is again first for any University in the region to have computerized it examination and registration system. In the field of Science and Technology our University is one of the leading institutions in North India. Our faculty members have bagged prestigious projects from the apex bodies like the DOT, CSIR, BARC and other organizations worth crores of rupees. Recently BARC has established a Nodal Calibration Centre at the campus. Guru Nanak was the first of the ten Sikh gurus and the founder of Sikhism. The birthday of Guru Nanak is observed as Guru Nanak Gurpurab across the globe. He is considered as one of the august religious thinkers ever. He travelled around to spread the message that there is only one God. He is accredited with setting up a distinctive social, political and spiritual platform based on virtue, equality, goodness and love. Guru Nanak's thoughts, views and words have been catalogued in the form of 974 poetic hymns in Guru Granth Sahib, the holy text of Sikhism. Following are some notable th With the advent of modern era of Science and Technology, a raging debate started that religions have lost ground to Science. The discoveries of Science falsified many myths of old religious scriptures. However, Guru Nanak and his revealed Bani has stood the test of time. Guru Nanak revolted against the hegemony of priestly class, both Hindu and Muslim, challenged the. In order to achieve high performance on modern and future machines, applications need to make effective use of the complex, hierarchical memory system. Writing performance-portable code continues to be challenging since each architecture has unique memory access characteristics. In addition, some optimization decisions can only reasonably be made at runtime.
